

Meeting Minutes 11/3/2020

Pictures are ok and encouraged for the CDR, in fact, we should include everything we have done to date.

We should discuss the validation plan during our meetings, it doesn't necessarily have to be on the CDR.

We plan to send our slides for review to Dr. Li and Dr. Kumar at least 3 days before the presentation to get some early feedback.

With regards to the portfolio materials, Mohamed can talk to Dr. Li for more on specifics of how he would like our portfolio to be setup.

For the Wiki page, it should also include whatever we have done to date. Be sure to include things like and intro, value proposition, research, project learning, design/s. It should also make clear what the general idea of what the project is about.

From Kiran, the permissions have finally been granted for access to the raw data from the emotive device.

We updated the professors on the headset design.

The CS program can start being developed in parallel with the headset, now that we have access to publicly available data sets.

We should have at least 1-2 reps per major speak during the CDR.
